SoyHenry
2022-2023
- **Agricultural Biotechnology Engineer**
UABC
2014-2019
- **Front-End Developer (HTML and CSS)**
OpenBootcamp
2022-2023

ABOUT ME

Full Stack Developer with a background in Agricultural Biotechnology Engineering, I have experience in developing full stack web applications including database, server and client. I have also developed pages only with HTML, JavaScript and CSS. I use technologies such as React, Redux, JavaScript, Express, Node, Sequelize, PostgreSQL to develop my web applications.

I have also used and continue to learn TypeScript, Tailwind, Python, Django, Mongoose and MongoDB. I have worked in teams of developers using Git, GitHub and following agile Scrum methodologies. I am self-motivated, committed and creative.

EXPERIENCE

• Teaching Assistant Of Full Stack Developers (TA)

SoyHenry

October 2022 - December 2022

I participated in meetings, led a group of students helping them become fluent in their interpersonal skills and took additional training classes to train my interpersonal skills as well.

Achievements

- I successfully guided more than 20 students until they reached their lab stage.
- I developed and improved my soft skills and those of the developers under my care

• Full Stack Developer (Pokemon, Foods and Videogames - Individual Projects)

SoyHenry

November 2022 - January 2023

Created several full stack applications with the PERN stack.

Achievements

- I developed more than 2 full stack applications from scratch.
- I developed multiple skills to become a better developer, such as resilience, perseverance and frustration tolerance.

• Full Stack Developer (ShopLine- Final Project)

SoyHenry

January 2023 - February 2023

I created an e-commerce with all its functionalities applying all the technologies learned in the SoyHenry bootcamp and also applied other like Stripe as a payment method, TypeScript and Auth0.

Achievements

- I developed a complete e-commerce
- I learned new technologies to improve my web development (TS, Auth0, Stripe)
